

The Legacy Cutting System from TRY TEK

Item 19-46035

Cutting kit used to reinstate laterals in 6" to 15" relined pipes.

- ✓ Durable stainless steel and brass construction
- ✓ Non-marring air bags lock cutter securely into position with superior clamping force.
- ✓ Operating distance in excess of 1000 feet.
- ✓ Accessories to extend the versatility of the cutting system.
- ✓ Free cutter maintenance training.
- ✓ Technical support service.

Other CIPP Solutions from TRY TEK

TRYDENT 80 Mobile Cutting System

Self-contained, mobile cutting system for reinstatement of 3" to 6" pipes

- Easily and systematically reopens lateral connections in pipes as small as 3 inches.
- Compact, self-contained system can be used for interior or exterior pipe relining projects.
- Set-up and operation are quick and simple.

Controlled Water Pressure Inversion Pipe Relining Unit

Reline pipes in tight spaces and areas with low overhead clearance.

- Limits the problems associated with pipe relining in areas with a high water table.
- Runs in excess of 1000 feet.
- Navigate bends and irregularities in the host pipe.
- Complete cures with reliable results.
- Single inflation provides more protection to host pipe than multiple inflations.
- Relines pipes from 6" to 18".

Reliability Comes Standard

A Trusted Solution Since 1985

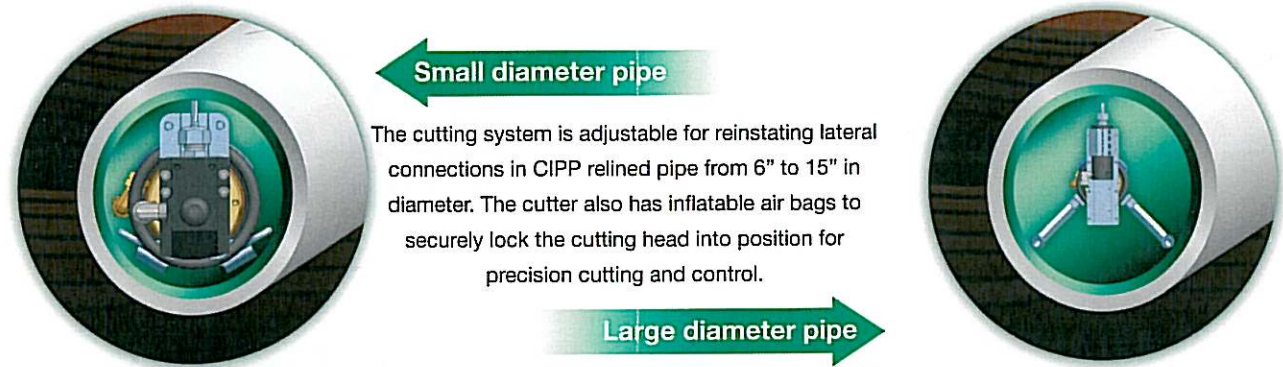

The TRY TEK Legacy Cutter.
Reinstates laterals in
6" to 15"
relined pipes.

www.trytek.com

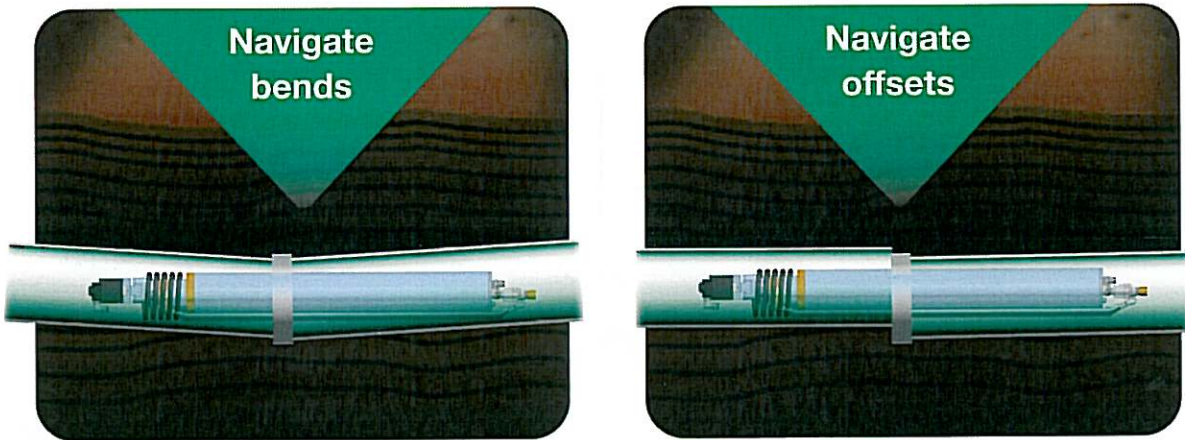

TRY TEK's Mainline Legacy Cutting System has been a reliable asset for reinstating CIPP relined pipes since 1985. Here's why:

 **The flexibility to handle a wide range of reinstatement situations.**
The Legacy Cutting System offers a wide assortment of skid packages, standoffs, cutting heads and air router mounts to handle virtually any 6" to 15" mainline reinstatement scenario with a single cutting system. The TRY TEK Legacy Cutter is an invaluable tool that has a proven track record of performance backed by hundreds of units in service since 1985.

TRY TEK offers technical support service and free maintenance training! Learn more at: www.trytek.com

 **The ability to navigate unexpected bends and offsets.**
Many times when reinstating lateral pipe connections, there are situations where the pipe has settled and offset, or there is an unexpected bend in the pipe. With the Legacy Cutting System from TRY TEK you can navigate offset and bent pipes.

Extend the versatility of your Legacy Cutting System with these accessories:

For reinstating lateral connections in larger, thicker pipe up to 15" in diameter.

.9 HP Round Air Router
(19-46031)

For reinstating lateral connections in 6" and 8" pipe.

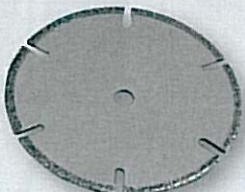

.6 HP Square Air Router
(04-0083)

For reinstating lateral connections in 12" or larger pipe. Gear reduction provides increased cutting torque.

.9 HP Round Gear Reduction Air Router
(13-6215)

For cutting clay and concrete (13-6776) or steel and cast iron pipe (13-6579).

3" Diamond Saw Blades

Used to smooth out the pipe edges after reinstating a lateral connection.

Wire Cup Brush
(13-6831)

Collets provide a tight grip on 1/4" router bit shanks that are manufactured too large or too small.

Collets, Spindles, and Collet Nuts
