

# OX

## Octodrive Xpander

8-Wheel Drive Expanding Transporter

### Benefits

- Eliminates the need for secondary manhole access, reduces crew size, no winch required
- Perfect for applications with single entry access
- Compatible with most inspection cameras and all T150 cutter systems
- Maintains inspection-quality camera image and simplistic T150 system cutting capability
- Increases application versatility with less cost over self-propelled cutting systems
- Broad functionality: Pulls cutting equipment with customer camera or functions as a powerful camera transport
- Expandable to other utility purposes

*Strong.....Like an Ox!*

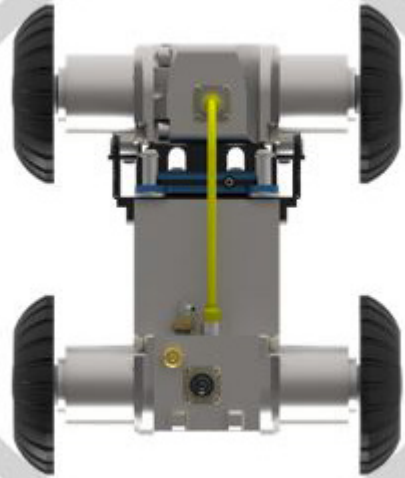

# Multiple wheel configurations for accessing 8" - 15" pipe

8" Set Up

12" Set Up

15" Set Up

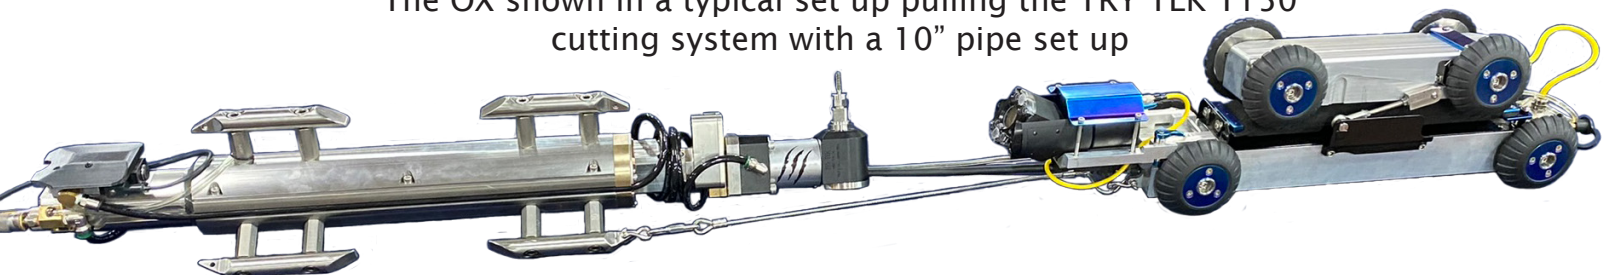

10" Set Up

## Technical Specifications

Machined from aerospace billet aluminum blocks - weighs only 60 pounds
Free-wheel capability for fast retrieval using camera cable reel
Quick-change durable rubber tires
Solid connection hubs with zero hub-to-tire slippage
Adaptable wheel configurations accommodate pipe size variation - lined or unlined
Universal camera cradle for 2.25" (57 mm) - 3.25" (82 mm) diameter mounting
Pulls a T150 cutting system, required air hose, and cable 600 ft plus
All 8-wheel drive system with electronic load leveling
Drive speed 60 feet per minute - similar to winch speeds
4 conductor requirement for control drive system
